WORK ORDER:

Customer Name: _____ Phone: _____

Address: _____

Vehicle Year: _____ Make: _____ Model: _____

Wheel Description: _____

Straightening [] Refinishing [] Chrome Plating [] Welding []

WHEEL SERVICES DISCLAIMER

Any wheel, no matter how slightly bent, MAY crack during the straightening process. We assure you that most wheels do not crack, and we take every precaution to maintain the integrity of your wheel throughout the process. If, in the event that your wheel does crack and is not repairable, we will not charge for time and labor spent in the effort to make the wheel straight, however you, the customer, will be responsible for the cost of a replacement wheel.

Most cracks are not repairable.

Not all wheels are repairable, most often for safety reasons or structural compromise and occasionally for economic reasons. (It may be less expensive to replace with a reconditioned or used wheel.)

Estimates given to customers do not constitute a contractual obligation on cost. Our repair facility will review your wheel and a qualified wheel technician will verify repairs when it arrives at the wheel facility. We will contact you in the event of any cost changes. Frequent up charges result from chrome plated finishes, polished finishes, wheels larger than 18", 2 and 3-piece wheels, and severely damaged or bent conditions.

We reserve the right to modify pricing in extreme cases, but will always inform you and obtain consent before any price increase.

Authorized: _____

wheels left over 30 days will be recycled
